Executive Summary:
The Mandate and Objective of AOW:Energy 2025

At AOW:Energy, our mandate is clear: to drive regional upstream development as the foundation of Africa's prosperity and to position the natural resource sector as a cornerstone of economic growth, industrialization, and energy security. We are committed to supporting Africa's collective ambition to harness its upstream assets not only for export but also to power local economies, strengthen regional integration, and deliver sustainable benefits to its people.

We are proud to champion pro-upstream development. AOW:Energy advocates for more barrels, more exploration, and more production as the catalysts for job creation, capital inflows, and industrial growth. At the same time, we recognize the responsibility that comes with this growth. Our platform highlights the innovations, policies, and technologies that enable Africa to advance upstream development while aligning with the global drive toward decarbonization and sustainable energy systems.

Oil and gas remain central to both regional and international development, and AOW:Energy stands firm in its belief that these resources are not a source of division but of unity. Rather than polarizing debates, we provide a trusted platform that brings governments, investors, and industry leaders together to collaborate on Africa's role in the global energy scenario. This is about building consensus, driving deals, and securing a future where Africa's resources serve both local and global needs.

We believe Africa's future lies in unity, international partnership, and shared equity. That means deeper collaboration across borders, a renewed commitment to local content and inclusion, and scaling up development that delivers wealth creation, job opportunities, and energy security across the continent. AOW: Energy is not just an event, it is a movement dedicated to aligning Africa's energy sector with its broader aspirations for growth, prosperity, and stability.

AOW:Energy: Proudly African, and proudly your industry event. AOW:Energy is your platform for inclusive development, integrity and unity for sustainable growth. We believe in the power of a united voice. Together, let's build the Africa we want: united, prosperous, and leading the future of global energy.

Event Overview

Key highlights include Ministerial Dialogues, National Oil Company showcases, Investor and Finance Forums, Technology and Innovation sessions, and exclusive networking opportunities designed to drive M&A, deal-making, and cross-border collaboration. AOW:Energy is where regional and international partnerships are forged, local content is elevated, and Africa's energy leaders unite under one roof.

Hon. Minister John Jinapor,

Minister of Energy and
Green Transition,
Republic of Ghana

Supported by the Government of Ghana

Focussed streams on exploration, production, decarbonization and technology

Programme outcomes

Deals Done

ENI Signed a major deal at AOW: In the 2025 event we saw the Government of Ghana and its Offshore Cape Three Points (OCTP) partners Vitol and Ghana National Petroleum Corporation sign a USD 1.5-billion deal live on the AOW:Energy stage. A groundbreaking moment which underscores the big deals happen at AOW:Energy.

The agreement was conducted between the Minister of Energy and Green Transition and the Minister of Finance and representatives of Eni and Vitol in the presence of Ghana's president,His Excellency John Dramani Mahama.

Regulators Forum Charter Signed: Engr Gbenga Komolafe deepened the ties between AOW:Energy and Nigeria when the AFRIPERF Pan African Charter was signed by 15 Member nations. This ground breaking moment will see Regulators from across the continent commit to policy, regulation and increased production together in unity. AFRIPERF then went on to commit its Annual General Meeting in AOW:Energy, cementing its position as the platform of choice for regualtors and CEOs in Africa.
